Education

SRI LANKA INSTITUTE OF INFOMATION TECHNOLOGY

Bsc(Hons) in information
technology specializing in
information technology
(2022-2026)

Kannangara CENTRAL COLLEGE Matugama

G.C.E A/L - Technology
Stream(2021)

ABOUT ME

I am a highly motivated and dedicated undergraduate seeking an entry-level opportunity in Software Engineering. I am passionate about software development and problem-solving, and I am eager to apply the knowledge and technical skills gained through my university studies. I am committed to continuous learning and contributing effectively to a dynamic and innovative development team.

RECENT PROJECT

○ Presentation Scheduling Mobile Appliation- PresentPath

Lead Mobile Developer Role - 2025

- Designed and built a cross-platform mobile app to streamline academic presentation tracking, evaluation, and scheduling, FeedBacks & performance Analysis.
- Implemented student and faculty role-based navigation, scheduling dashboards, presentation evaluation modules, and Smart FeedBack Generator and Performance Analysis & automated notifications.
- Integrated calendar APIs for seamless scheduling and reminders, with support for offline data persistence and secure user authentication.
- Contributed to backend service design, API integration, and database structuring to ensure scalability and real-time data synchronization.
- Tech Stack: React Native (Expo), Node.js, Express.js, MongoDB, REST APIs, GitHub, Figma.

○ A Culinary Learning & Skill Sharing Platform - CookHUB

Lead Full-Stack Developer Role - 2025

- Developed a web-based platform enabling users to share culinary skills, publish posts, and engage in interactive communities.
- Implemented core features including community creation, post publishing, likes & comment management, and role-based access.
- Designed and integrated a learning module for structured culinary courses and tutorials.
- Built RESTful backend services with Spring Boot and integrated with a React frontend for responsive user experience.
- Collaborated on database schema design, API endpoints, and real-time interaction features to ensure scalability and reliability.
- Tech Stack: Spring Boot (Java), React.js, MongoDB, REST APIs, GitHub, Figma.

○ Japanese Class System- Japan Panthiya

Lead Full-Stack Developer Role - 2025

- An interactive Japanese learning platform where teachers can upload video-based lessons and create quizzes for each course, helping students learn effectively and test their knowledge step-by-step
- Tech Stack: Spring Boot (Java), React.js, MongoDB, REST APIs, GitHub, Figma.

Expertise

SOFT

- Team Leadership
- Communication Skills
- Problem Solving
- Collaborative Skills
- Critical Thinking

TECHNICAL

- QA Methodologies
- Manual Testing
- Java Script
- MYSQL
- React Native
- MERN Stack
- Java
- HTML
- CSS
- PHP
- Kotlin
- C++
- C

Languages

English

Sinhala

○ Gym Management System - Fitness Kingdom

Lead Full-Stack Developer Role - 2024

- A web-based platform designed to streamline gym operations by managing members, training sessions, supplement inventory, meal plans, and financial records.
- The system enables gym owners and trainers to efficiently organize schedules, monitor member progress, and manage daily gym activities.
- It also supports personalized fitness and nutrition plans for members while maintaining accurate records of subscriptions and payments.
- The platform improves operational efficiency by centralizing gym management processes into a single, user-friendly system.
- Tech Stack: MERN Stack (MongoDB, Express.js, React.js, Node.js)
